One control room for three ESP32 boards.

Monitor each device, open a component, and make
from a single browser dashboard.

1 At-a-glance status

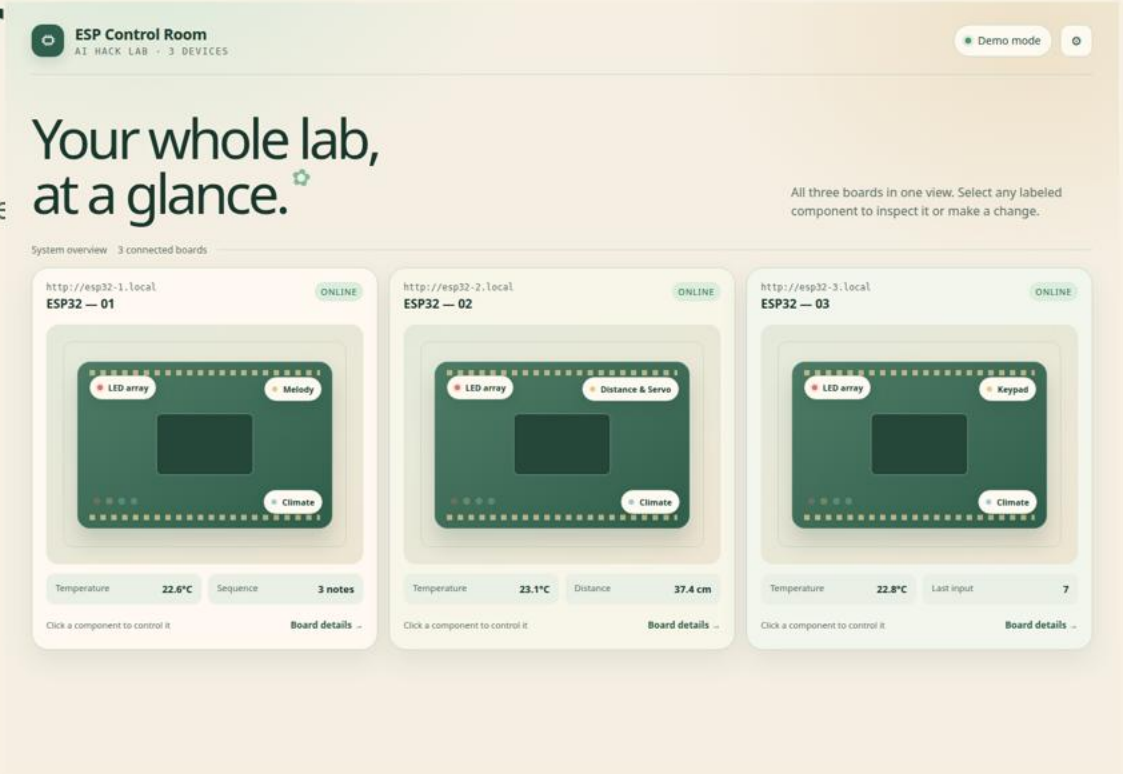

Connectivity, climate, and headline readings

2 Direct component access

Open LEDs, climate, and board-specific tools

3 Local-network control

Configure addresses and send Wi-Fi commands

Each board adds a focused interaction.

Shared climate monitoring and four-color LED controls stay consistent.

ESP32 — 01

SOUND + COMPOSITION

- Build melodies on a C3–B5 piano
- Set note lengths, dotted notes and ties
- Play, edit, copy and save tunes

ESP32 — 02

MOTION + DISTANCE

- Read ultrasonic distance
- Move the servo from 0° to 180°
- Release the servo from the UI

ESP32 — 03

INPUT MONITORING

- Show the currently held key
- Remember the latest keypad input
- Refresh readings every five seconds
